

Module Name	Bituminous Coal Production
Module Description	Production and processing of bituminous/subbituminous coal.
Scope and Boundaries	Includes mining and coal processing operations.
Geographic Representation	North America
Technological Representation	Mining data represent U.S. average of surface and underground mining technologies. Processing data represent only mechanical cleaning methods.
Data Types and Sources	Secondary data provided by government agencies. Other data based on industry publications and conversations with industry experts.
Data Provider	Secondary data provided by U.S. EPA, DOE, EIA, Department of Commerce, and Code of Federal Regulations.
Allocation	none
Aggregation	none
Category	Fuels, Energy and Transportation
